Description
Type here to enter a description of this virtual machine.
Virtual Machine Details
State: Powered off
Configuration file: C:\Users\mano\OneDrive\Documents\Ubuntu 64-bit.vmx
Hardware compatibility: Workstation 17.5 or later virtual machine
Primary IP address: Network information is not available

Clone Virtual Machine Wizard
vmware
WORKSTATION
PRO™
Welcome to the Clone Virtual Machine Wizard
This wizard will help you create a copy of this virtual machine.
If you intend for other users to create clones from this virtual machine, you should enable template mode under VM > Settings > Options > Advanced.

Clone Virtual Machine Wizard
Clone Source
Which state do you want to create a clone from?
Clone from
The current state in the virtual machine
Creating a linked clone from the current state will create a new snapshot.
An existing snapshot (powered off only):
This virtual machine has no existing cloneable snapshots.

Clone Virtual Machine Wizard
Clone Type
How do you want to clone this virtual machine?
Clone method
Create a linked clone
A linked clone is a reference to the original virtual machine and requires less disk space to store. However, it cannot run without access to the original virtual machine.
Create a full clone
A full clone is a complete copy of the original virtual machine at its current state. This virtual machine is fully independent, but requires more disk space to store.
